Too-Ezi™

A garage with a difference.

The Deluxe Garage has a 20° roofpitch to match the aesthetics of your new or existing home. Alternatively you can choose to have a curved roof for something a little different.

Customers have a choice of metal cladding (corrugated or trimdeck), hardiplank, cedar or blueboard (Blueboard is best suited if you are planning to render—render is provided with the kit.)

The wall panels in the deluxe garages are programmed with 600mm studs and are ready for lining. (Please note that the Deluxe shed is engineered to be a Class 10 building (a non-habitable structure.) It cannot legally be lived in.

For use as a garage customers can choose from either roller doors or panel doors—automatic roller doors are also an option. Sliding glass doors and PA doors are also available for use as a games room, studio etc.

If you prefer to have the Novelty Shed raised off the ground, our easy to assemble floor frame can be put together in a matter of hours once the posts have been set into the footings.

**Novelty Shed Range**

The Novelty Shed is a Class 10 structure—it cannot be legally lived in. Habitable dwellings are class 1 structures.

But it can be used as a studio, games room, gym, bar and billiard room or anything else you fancy!!

Please note that the Novelty Shed does NOT have gable eaves. If you would like eaves, please have a look at our Deluxe range.

The Novelty Shed may be used for any purpose where vermin proofing is required.

The Novelty Shed range has a standard roof pitch of 12 degrees although for an additional charge a 20 degree roof pitch is available.

Ceilings may be lined with our standard “ceiling kit”, with a choice of either cathedral style or flat ceiling.

Wall panels have 600mm centres and are ready to line internally.

Customers have a choice of metal cladding (corrugated or trimdeck), hardiplank, cedar or blueboard (Blueboard is best suited if you are planning to render—render is provided with the kit.)

If you prefer to have the Novelty Shed raised off the ground, our easy to assemble floor frame can be put together in a matter of hours once the posts have been set into the footings.

**Gable and Skillion Carports**

6x6 Gable Carport used as an entertaining area

6x6 Skillion Carport used as a Gazebo
